Nidhi Bhansali

Senior React Native Developer | Mobile Engineering | Node.js

bhansali.nidhi1997@gmail.com +91 9727068503 linkedin-profile

Professional Summary

Accomplished Senior React Native Developer with **6.6+ years of experience** designing, developing, optimizing, and deploying scalable mobile applications for iOS and Android. Strong expertise in React Native, JavaScript, TypeScript, Redux, React Native CLI, Expo, RESTful APIs, GraphQL, and Node.js, with hands-on experience integrating third-party services and building production-ready mobile solutions. Experienced in application performance optimization, debugging, testing, CI/CD, app store deployments, and end-to-end release management. Proven ability to mentor developers, conduct code and PR reviews, collaborate directly with clients and cross-functional teams, and translate business requirements into reliable technical solutions. Seeking a Senior React Native opportunity to contribute technical leadership while building high-quality, scalable mobile products.

Professional Experience

Senior Software Engineer at Capitalnumbers Infotech Limited

April 2024 – Present

- Develop production-grade iOS and Android applications using React Native, TypeScript, Redux, Expo, and React Native CLI.
- Integrate REST APIs, GraphQL, Node.js, MongoDB, Firebase, Pusher/WebSockets, and third-party services.
- Implement KYC/vKYC, card management, PIN/passcode, payment, QR, deep linking, authentication, and real-time workflows.
- Manage Android/iOS builds and releases through Google Play Console, App Store Connect, and TestFlight.
- Work on mobile security including SSL pinning, root/jailbreak detection, secure token storage, cryptography, and VAPT remediation.
- Investigate production issues using Kibana, Sentry, Dynatrace, Postman, and Insomnia.
- Optimize performance through render optimization, caching, lazy loading, memory optimization, and API-call reduction.
- Communicate directly with clients and collaborate with backend, QA, design, and product teams.
- Conduct code/PR reviews and mentor junior developers.
- Use Claude and Cursor for AI-assisted development and debugging.

SR. React Native Developer at Inara Consultancy Service

July 2020 – April-2024

- Developed cross-platform iOS and Android applications using React Native.
- Integrated Google Maps, Firebase, REST APIs, GraphQL, and third-party services.
- Built reusable and responsive UI components based on product requirements.
- Integrated Dynatrace for analytics and performance monitoring.
- Collaborated with designers, product owners, backend developers, QA teams, and clients.
- Participated in requirement analysis, debugging, testing, Agile ceremonies, and releases.
- Conducted code reviews and mentored junior developers.

React native Intern at Qodors Private Limited

Dec 2019 – July 2020

- Responsible for coding, and designing the project.
- Knowledge of different front-end technologies like HTML,CSS, Javascript, React Native &
- databases like MySQL, CouchDB, Firebase etc.

Technical Skills

- **Core**: React Native | React.js | JavaScript | TypeScript | Node.js | Redux | Redux Toolkit
- **Mobile**: React Native CLI | Expo | React Navigation | Responsive UI | Deep Linking | QR Codes | Push Notifications | Native Modules | iOS | Android
- **Backend**: Node.js | Express.js | REST APIs | GraphQL | MongoDB | MySQL | Firebase | JWT | Pusher/WebSockets
- **Security**: KYC/vKYC | UPI | Payment Flows | Card Management | SSL Pinning | Root/Jailbreak Detection | Cryptography | VAPT
- **Testing & Monitoring**: Jest | Unit Testing | API Testing | Debugging | Sentry | Dynatrace | Kibana | Firebase Crashlytics | Firebase Test Lab
- **DevOps**: Git | GitHub | GitLab | Bitbucket | Azure DevOps | GitHub Actions | CI/CD | App Store Connect | TestFlight | Google Play Console
- **Professional**: Client Communication | Requirement Analysis | Technical Leadership | Mentoring | Code Reviews | Agile/Scrum | Team Collaboration

Project Experience

SCONTO — STUDENT IDENTITY & DISCOUNT PLATFORM

React Native | TypeScript | Node.js | MongoDB | M2P | Pinelabs | Kibana

Live App: Google Play | App Store

- Developed Sconto Card, Discovery, Categories, KYC and vKYC modules.
- Integrated M2P and Pinelabs APIs for card, payment, and validation workflows.
- Implemented SSL pinning and root/jailbreak detection.
- Managed development, staging, and production API integrations.
- Used Kibana and Postman for monitoring and API debugging.
- Managed TestFlight/App Store releases and client communication.
- Mentored junior developers.

SHARE2CARE — REAL-TIME CAREGIVER PLATFORM

React Native | TypeScript | Redux Toolkit | Pusher | Firebase | Sentry

Live App: Google Play | App Store

- Owned the real-time communication layer using Pusher/WebSockets.
- Built reusable Pusher connection management and resolved reconnect, logout/login, profile-switching, and channel lifecycle issues.
- Improved Activity Feed performance by reducing unnecessary re-renders and redundant API calls.
- Built reusable cross-brand UI components and design tokens.
- Added connectivity status UI and Sentry monitoring for real-time errors.
- Supported multi-brand Android/iOS builds and client releases.

POOL WAREHOUSE — POOL LINER PRO

React Native | Expo | TypeScript | Redux Toolkit | Node.js | WordPress API

- Built the Pool Liner quotation flow end-to-end, including measurements, patterns, media, signatures, review, and submission.
- Extended the app with a Pool Cover workflow using reusable components.
- Integrated Node.js and WordPress REST APIs using RTK Query.
- Implemented OTP authentication, refresh tokens, secure storage, and device-aware sessions.
- Added offline drafts, queued submissions, caching, retry handling, and media compression.
- Improved performance using FlashList, lazy loading, and optimized API caching.
- Managed Expo upgrades and Android/iOS release workflows.

CAMBEO — OFFERS & BUSINESS MANAGEMENT PLATFORM

React Native | React.js | Node.js | MongoDB | Firebase | Redux

Live App: Google Play | App Store

- Developed mobile experiences for end users and business users.
- Implemented venue maps using MapView, push notifications, and multi-image uploads.
- Integrated Firebase Authentication and FCM.
- Fixed QR scanner functionality and improved application workflows.
- Managed Android/iOS testing, TestFlight, and App Store releases.

TEMPI — COLLABORATION & TASK MANAGEMENT

React Native | Expo | Firebase | REST | GraphQL | Azure DevOps

Live App: Google Play

- Led UI modernization across iOS, Android, and Web.
- Developed modules including Groups, Tasks, and Folders.
- Integrated REST and GraphQL APIs.
- Supported Firebase functionality and real-time updates.
- Managed alpha/beta builds and participated in debugging and performance optimization.

CARESOURCE — HEALTHCARE APPLICATION

React Native | TypeScript | OKTA | Firebase Crashlytics | CodePush

- Integrated OKTA authentication for secure login.
- Redesigned member selection, navigation, member details, and settings.
- Implemented dynamic role-based navigation and EULA handling.
- Integrated Firebase Crashlytics.
- Researched and supported CodePush/App Center OTA update workflows.
- Created alpha/beta builds and tested APIs across environments.

STONEX — MARKET INTELLIGENCE & TRADING

React Native | TypeScript | REST APIs | Azure DevOps | CI/CD

- Developed UI improvements across web and mobile applications.
- Worked on Offers, Contracts, and Locations modules.
- Integrated APIs with front-end functionality.
- Maintained CI/CD pipelines using Azure DevOps.
- Communicated directly with clients and participated in Agile delivery.

RCV PAY — HOSPITALITY SCHEDULING

React Native | Laravel | MySQL | Stripe

- Developed authentication, booking, profile, and scheduling workflows.
- Integrated REST APIs and Stripe payments.
- Supported Android/iOS release workflows and client communication.

TRAVEL-HOTLINE-MVP

React Native | Expo | Firebase | GitHub Actions | Jest

- Led initial MVP development and Expo project setup.
- Configured Android, iOS, and Web environments.
- Integrated Firebase and Jest.
- Implemented GitHub Actions CI/CD pipelines.

BELK — E-COMMERCE

React Native | Firebase | Dynatrace | Firebase Test Lab

Live App: Google Play | App Store

- Integrated Dynatrace analytics and resolved application bugs.
- Used Firebase Test Lab for device/OS compatibility testing.
- Supported QA and release-quality improvements.

REVOLT SUMMIT 2022

React Native | Firebase FCM | Jest

- Developed React Native flows and reusable components.
- Integrated push notifications and unit/snapshot testing.
- Collaborated directly with U.S.-based clients.

WAVEBITES — FOOD DELIVERY

React Native | GraphQL | REST APIs

- Developed cart, order, payment, location, restaurant listing, and search functionality.
- Integrated GraphQL APIs and collaborated with backend/design teams.

Education

MASTER OF COMPUTER APPLICATIONS — GOLD MEDALIST

- Dharmsinh Desai University (DDIT), Nadiad | Aug 2017 – May 2020

BACHELOR OF COMPUTER APPLICATIONS

- VNSGU University — S.S. Agrawal College, Navsari | Aug 2014 – May 2017

Languages

- English | Hindi | Gujarati
